- Q1.
- a. `|` turns on the bits where either operand is on
 - b. `&` turns on the bits only if on for both operands
 - c. `^` turns on bits where the operands differ
 - d. `~` flips bits
 - e. `<<` right pads n times with 0
 - f. `>>` drops n right-most bits

Q2.

Q4.

- a. $31 \rightarrow \$s0 = 0x8000001F$ ■
 $0x0AAAAAAAA \rightarrow \$s0 = 0x0AAAAAAAA$ ■
- b. If there are an even number of 1 in $\$s0$, the 31st bit is set to 1, else it is set to 0 ■
